Product specifications are subject to change without notice.

All necessary equipment of the spa is mounted within the perimeter of the shell, so the spa is easy to install. You can locate the spa just about anywhere you wish—on a deck, patio, or even indoors. Be sure to position it above ground in an area with good drainage, and on a level, continuous surface which can support the approximate total weight including the spa, water and people. Refer to owner's manual for specific installation instructions.

Access to the spa's equipment must be provided for service and general maintenance.
