Important: Read complete instructions before beginning installation.

Remove the unit from the carton. Retain the shipping carton until satisfactory inspection of the product has been made. Immediately upon receipt, inspect the unit before installing. Should inspection reveal any damage or defect in the finish, do not install the unit. Damage or defect to the finish claimed after the bath is installed is excluded from the warranty. Jacuzzi Whirlpool Bath's responsibility for shipping damage ceases upon delivery of the products in good order to the carrier. Refer any claims for damage to the carrier. For definitions of warranty coverage and limitations, refer to the published warranty information packed with the product.

Jacuzzi Whirlpool Bath is not responsible for any defect that could have been discovered, repaired, or avoided by following this inspection and testing procedure.

Installation

The unit should be installed after construction of the studwall and rough plumbing is in place. Refer to illustration for rough-in drain position for a particular unit. Prior to installation, make sure framed-in area is square and plumb. Check that the subfloor is level. If not level, use a floor leveling compound. Mortar, plaster or minimal expansion foam may be used.

The locations of the valves, fill spout, wallbar with hand held shower and shower head should be marked and drilled before the bath unit is placed in position. Where access to connections is limited, allow enough flexibility in the supply lines for easier positioning of the valves after the unit is in place.

From stable reference points such as the subfloor and front of the double studs, measure and note the locations of the fill spout, valves, wallbar with hand held shower and shower head arm. The wall bar should be installed so as not to obstruct the use of any grab bars.

Consult local authorities for plumbing code requirements in your area.

IMPORTANT: Proper installation of the plumbing and compliance with local codes is the responsibility of the installer. Jacuzzi Whirlpool Bath does not warrant connections of water supply fittings and piping, fill systems or drain/overflow systems. Nor is it responsible for damage to the unit which occurs during any installation procedure.

Slide the unit into the framed opening and check the level. Secure top and side flanges with screws. Install plumbing hardware and drain assembly (follow manufacturer's instructions). After drain is fully installed, test for proper drainage. If the unit does not drain properly, rectify this condition before proceeding with the installation. **Jacuzzi Whirlpool Bath is not responsible for removal and/or reinstallation costs.**

NOTE: Watertight installation of the drain is the installer's responsibility. Drain leakage is excluded from the Jacuzzi Whirlpool Bath warranty.

Cleanup After Installation

To avoid dulling and scratching the surface of the bath, never use abrasive cleaners. A mild liquid detergent and warm water will clean soiled surfaces.

Remove spilled plaster with a wood or plastic edge. Metal tools will scratch the surface. Spots left by plaster or grout can be removed if lightly rubbed with detergent on a damp cloth or sponge.

Paint, tar, or other difficult stains can be removed with paint thinner, turpentine, or isopropyl alcohol (rubbing alcohol).

PRODUCT SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

USE INSTALLATION INSTRUCTIONS SUPPLIED WITH PRODUCT.

Jacuzzi Whirlpool Bath has obtained applicable code (standards) listings generally available on a national basis for products of this type. It is the responsibility of the installer/owner to determine specific local code compliance prior to installation of the product. Jacuzzi Whirlpool Bath makes no representation or warranty regarding, and will not be responsible for any code compliance.
