

# Water Rainbow® Extension Kit Installation Instructions

**IMPORTANT: Read all instructions before beginning installation. Consult local codes for requirements.**

The Water Rainbow Extension Kits are designed for use in conjunction with the standard Water Rainbow Fill Spout and the Water Rainbow LS. Plumbing codes may require the installation of an anti-siphon valve when the fill spout outlet is less than 1" above the bath rim. The Extension Kits are designed to raise the fill spout to the necessary height and eliminate the need for an anti-siphon valve (see Illustrations A and B). These Kits and the Water Rainbow, or Water Rainbow LS, should be installed simultaneously.

Contents of the Kit: extension, brass standoffs (2), brass coupling, and instruction sheet.

## Mounting the Fill Spout

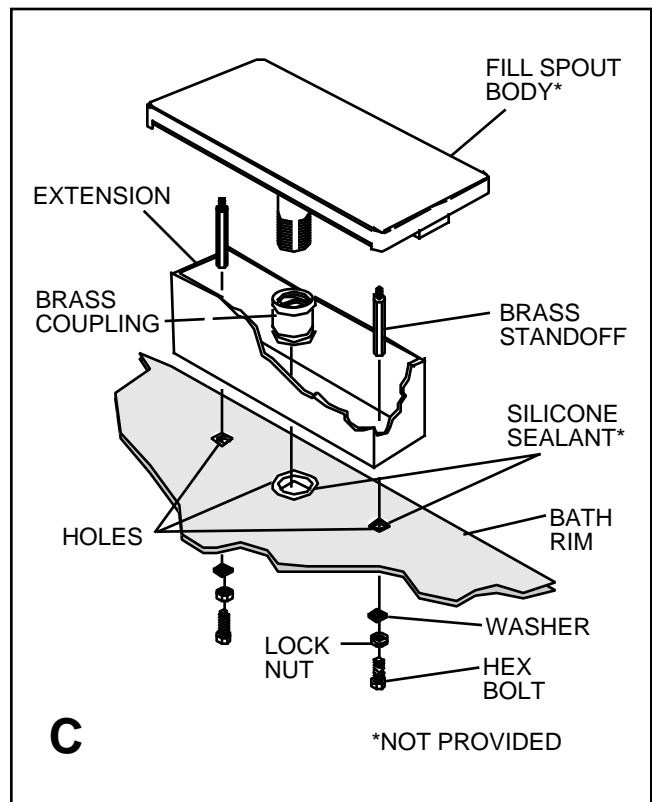

The center hole in the shell may need to be enlarged to accommodate the brass coupling. A hole diameter of 1-1/2" is needed.

Apply a 3/16" bead of silicone sealant (not provided) on the shell surface around the drilled holes in the shell (see Illustrations ).

Connect the brass coupling to the pipe extension of the Water Rainbow. Use Teflon™ tape or thread sealant designed for use on plastic pipe. Attach the two brass standoffs to the bottom of the Water Rainbow.

Align the brass standoffs with the drilled holes and insert the brass coupling through the shell.

Fully install the 1/4-20 hex nuts onto the 1/4-20 x 1-1/2" hex bolts; then install the large flat washer onto the bolts. Insert the bolts through the shell (from under the rim) and into the brass standoffs in the fill spout body. Align extension with Water Rainbow fillspout, finger tighten the hex nuts against the washer, then tighten until snug using a 7/16" wrench. **Do not overtighten.** Refer to Illustration C.

# WATER RAINBOW EXTENSION KITS

PART	PART NUMBER	USED ON
3.25 BLACK	B549000	AMEA, AMEA6, CIVA, CIPREA, TARA, PRIMA, VISTA
2.25 BLACK	B548000	EURA, MAGNA MIRA, SIGNA, SIGNA 6

## IMPORTANT

Proper installation of the fill spout and compliance with local codes is the responsibility of the installer. Jacuzzi Whirlpool Bath does not warrant connections of water supply fittings and piping, fill systems, or drain/overflow systems, nor is it responsible for damage to the bath which occurs during any installation procedure.

**PRODUCT SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.  
USE INSTALLATION INSTRUCTIONS SUPPLIED WITH PRODUCT.**

Jacuzzi Whirlpool Bath has obtained applicable code (standards) listings generally available on a national basis for products of this type. It is the responsibility of the installer/owner to determine specific local code compliance prior to installation of the product. Jacuzzi Whirlpool Bath makes no representation or warranty regarding, and will not be responsible for any code compliance.
