INSTALLATION

The Stylos must be placed on finished surface of shower base. The water supply lines must be located as shown and have two 90° elbow pipe fittings (not provided) facing downward. All measurements are taken from shower base surface on which Stylos will be resting.

Draw a vertical center line (or chalk line) between the pipe fittings. The brackets are equally spaced on either side of this line. Using the brackets as a template mark the screw hole positions top and bottom. Drill screw holes with a 15/64” drill bit, insert wall anchors and temporarily fasten the brackets to level them. When level, tighten the screws.
Position the shower wall and connect the hoses to the water supply using the rubber washers provided. Connect the hand-held shower head with washers as shown below. Turn the water supply on and check that there are no leaks.

Put the shower wall on the brackets. Press downwards from above and hook the metal structure of the shower wall onto the brackets. Use the two screws to secure the unit to the upper brackets.
Operation
By turning on the mixer valve, the shower function is enabled. The hydromassage function is enabled by pressing the transfer valve button. Note: when turning off the mixer, the switch returns to the shower function.

Maintenance
To avoid dulling and scratching the surface of the bath, never use abrasive cleaners. A mild liquid detergent and warm water will clean soiled surfaces.

Minor scratches which do not penetrate the color finish can be removed by lightly sanding with 600-grit wet/dry sandpaper. You can restore the glossy finish to the acrylic surface of the unit with a special compound, Meguiar's #10 Mirror Glaze. If that is not available, use automotive rubbing compound followed by an application of automotive paste wax.

Major scratches and gouges which penetrate the acrylic surface will require refinishing. Ask your Jacuzzi Whirlpool Bath dealer for special instructions.
